TRY YOUR APP

Hi Elysia

Your round-4 notes are in: passwords, events, rewards and more. This link is the **practice version**: made-up clients, no real payments, no emails. Try anything; you can't break it.

reform-pilates-seven.vercel.app

On your phone: open the link, then in the browser menu tap **Add to Home Screen** to use it like an app. It updates by itself.

WHAT'S NEW your latest notes

Passwords

Clients **create an account once** (name, surname, date of birth, email, mobile, password) and then sign in with **email + password**. **Forgot password?** sends a code by email. You sign in on the same page and go **straight to your studio**; **Client view ↗** shows the app as clients see it.

Home & My classes

Studio, Events and Rules & policies are **lavender buttons**. The next event shows **above "Next available"**, only when there is one, and stays private if it's for clients only. **Book the same days every week** now sits inside each package.

Events

Price **€0 = free**: one tap, no payment question. Ask people a **question** when they book (e.g. dietary needs) and see the answers on your list. When you add someone who isn't a client yet, enter their **name, phone and email**. "Special event" now just says **Event**.

Rewards & discount codes

Give a client **10% off, € off or free classes** on their next package: they get an email and it's applied by itself. Make codes like **SUMMER10** for Instagram; clients type them under **Have a code?** Each person can use a code once.

Studio side

Stats history: pick a month, or a year with one bar per month (revenue, packages sold, fill rate, bookings, new clients). **Settings** open section by section. Class types have no price; packages are one list with **+ Add a package**. The birthday cake is plain.

Your answers, done

Waitlist	No free 30 minutes; the usual 6h rule
SMS	Not yet: email only
Unpaid trial	Not an active client
Freeze	From–To: no bookings in between
Attendance	Change it any time
Age	18 or over only

1 · TRY IT AS A CLIENT about 5 minutes

1. Tap **Secure your package**, then **Create account**. Use **any email** and a password you'll remember. In the practice version the email code fills itself in: tap **Confirm**, then answer the **health questions**.
2. Pick a package. If you made a code in step 2 below, tap **Have a code?** and watch the price change.
3. Choose **Cash** or **Revolut**, tick the box and **Request package**. Mark it paid in your studio, then book from the **Schedule**.
4. **My classes**: tap your package. **Book the same days every week** is there now.
5. **Home**: the three lavender buttons, and the **Upcoming event** above Next available.
6. Book the **free event** you made in step 2: it says **Book your free spot** and asks your question. Nothing to pay.
7. Sign out (Account), then sign in again with your **email and password**. Try **Forgot password?** too.
8. Try creating an account with a date of birth under 18: it explains classes are for adults.

To see a regular client with a package, sign in as **elena@example.com** with the password **reform-demo**.

2 · RUN YOUR STUDIO about 7 minutes

1. Sign in on the same page with **elysia.stephani@gmail.com** and the **studio password** we sent you separately. You land in your studio; **Client view ↗** (top right) shows the client app.
2. **A free event:** Classes → **New class** → type **Event**, give it a title, price **0**, and under **Event options** a **question for people booking**.
3. **Add someone to a class:** open a class, pick an existing client or **...or someone new** (name, phone, email, a note). Choose paid, package class, not paid yet, or **Free**.
4. **Attendance:** open a past class and set each person to **Attended**, **No-show** or **Not marked**. You can change it later.
5. **Rewards:** Clients → open **Elena** → **Rewards** → **Give a reward** (e.g. 1 free class). It's applied to her next package by itself.
6. **Discount codes:** Clients → **Discount codes**. Create **SUMMER10** (10% off), with an end date or a limit if you like.
7. **Freeze a package:** on a client's page, Adjust package → **Freeze**, pick **From** and **To**. No bookings with that package in between, and the end date moves by the same days.
8. **Stats:** this week, then choose a **Month**, then a **Year** and what to **Show**.
9. **Settings:** tap a section to open it. **Class types** explains what they are; under **Packages**, **+ Add a package**.

In the practice version **Sofia Andreou** always has her birthday today: see the cake in Clients and send her the birthday email.

YOUR QUESTIONS, ANSWERED

"Add class type": what is it?

A class type is what shows on the schedule and in your timetable (Reformer, Mat…), how long it is, how many spots, and **which package pays for it**. Make one when you start a new kind of class.

A new package

Settings → Packages → **+ Add a package**: Reformer or Mat, classes per week, months and price. The name ("Reformer · 8 classes · 1 month") is written for you.

A pre-natal class

Settings → Class types → add **Pre-natal**, choose whether Reformer or Mat package classes pay for it, then add it to your timetable. If you'd like **separate pre-natal packages**, tell us and we'll build it.

Public events

Anyone signed in can book from Events or the Schedule. Paid: they pick cash or Revolut and you mark it paid. Free: one tap. Events can't be cancelled in the app.

WHAT'S LEFT TO DO

Your real app is live at **book.reformpilatescy.com**, with emails working. It's separate from this practice version, so made-up clients never mix with real ones.

You, in the real app

- [ ] Set your password: tap **Forgot password?** on the sign-in page; a code arrives by email
- [ ] Settings → Your studio: address, phone and email for clients
- [ ] Settings → How clients pay you: Revolut link, IBAN, account name
- [ ] Check your packages and prices

You, your classes and photos

- [ ] Set your weekly timetable once (Classes → Monthly timetable)
- [ ] Upload studio photos and your logo (Settings → Photos)
- [ ] Add your first events, with pictures
- [ ] Write the few lines for The Studio (Settings → Your texts)

Quick questions (we used the answer in brackets for now)

- [ ] Should a reward or code also work on a trial or drop-in? (packages only)
- [ ] A code and the student discount don't add up: the bigger one applies. OK? (yes)
- [ ] Pre-natal: paid with Reformer or Mat package classes, or its own packages? (package classes)

Us, before launch

- [ ] Have a lawyer read the Terms, Privacy and health consent
- [ ] Soft launch: 3–5 regular clients for a week
- [ ] Upgrade the hosting plan (about $20/month) before the link goes in your Instagram bio

Later, when you're registered

- [ ] Card payments in the app (online payments stay off until then)
- [ ] Text messages for the waitlist, when you want them
- [ ] Ideas for later: gift vouchers, referrals, Greek / Russian

Your opinion

- [ ] What felt confusing or too much?
- [ ] Anything that doesn't sound like you?
- [ ] Anything missing before you'd use it with real clients?
